

Frame Scaffold Measurement Guide

- A. _____ Frame Width**
Measure from center of frame leg-to center of frame leg.
- B. _____ Frame Height**
Measure from top of frame leg-to bottom of frame leg (without coupling pin).
- C. _____ Lock Spacing**
Measure the distance from the center of the top lock to the center of the bottom lock (where the cross braces attach).
- D. _____ Location of Top Lock**
Measure the distance from the top of the frame leg to the center of the top lock.
- E. _____ Diameter of the Frame Leg**
Measure frame leg, outside to outside. Common sizes: 1.5", 1.625" & 1.69" (*It's best to use a caliper*)
- F. _____ Specify the Angle of Pin Holes**
45° or 90°
- G. xxxxxx What type of Frame Locks are on your frame?** _____
Please list the name.
- H. xxxxxx Do you have a Walk-Thru Frame, or a Mason Frame?** _____
Please list the name.
- I. xxxxxx If you have a Mason Frame, how many steps does it have?** _____
Number of intermediate steps, or rungs.
- J. xxxxxx Are there any manufacturer's labels on your scaffolding?** _____
Please list the name.
